# Barcelona commits to sustainable mobility with 73 Renault Trucks electric vehicles

The city of Barcelona made a strong choice in favour of decarbonised urban mobility when awarding its latest public contract for municipal waste collection and maintenance. This contract was awarded in batches to several waste management sub-contractors who share the same sustainability goals for the city. The companies CLD Sorigué, Urbaser, and Valoriza (Sacyr Group) chose Renault Trucks to provide 73 fully electric trucks that will soon hit the Catalan capital's streets.

Barcelona has made a strong commitment to reducing its carbon footprint by requiring zero-emission trucks in its most recent public tender covering the city's maintenance. With this order of 73 Renault Trucks electric vehicles for cleaning and waste collection from CLD Sorigué, Urbaser, and Valoriza, the Catalan capital is improving quality of life thanks to silent, emissions-free collection while staking its place as a European model for decarbonisation.

### 73 Renault Trucks E-Tech D and D Wide to clean the city

Thanks to the diversity of its electric range and environmental expertise, Renault Trucks was able to offer the ideal solution to this complex public tender. Rear loaders (single and dual-compartment), side loaders (right and left), sweeper-sprayer tankers, tipper and crane trucks, lifting hooks, and low-entry cabs for greater operator comfort: Renault Trucks E-Tech D, D Wide, and D Wide LEC can be fitted with a wide variety of body designs to meet municipalities' needs.

These all-electric trucks are being delivered in batches for gradual implementation, including a training period to teach operators about electric technology and driving techniques. The first batch, including rear loaders, sweeper-sprayers and a tipper, have been delivered and the vehicles are already hard at work in the city's streets.

Thanks to its range of all-electric, ultra-versatile vehicles and extensive distribution and repair network, Renault Trucks intends to maintain its market-leading position in the municipal vehicles segment.

## About Renault Trucks

Renault Trucks, the French truck manufacturer, has been providing professionals with transport solutions since 1894, from light commercial vehicles to heavy duty tractors. Committed to energy transition, Renault Trucks offers fuel efficient vehicles and a complete range of 100% electric trucks, with their operating life extended through a circular economy approach.

Renault Trucks is part of the Volvo Group, one of the world's leading manufacturers of trucks, buses, construction equipment and industrial and marine engines. The group also provides complete financing and service solutions.
